Our best. Your best.

August 26, 2019

Dear Families,

Hello! I would like to take this opportunity to introduce myself. My name is Jean Han and I will be working as a student teacher in your student's classroom this fall. I am a Math major and English minor in Secondary Education at Central Michigan University. In order to graduate in December of 2019, I will be completing the last semester of my undergraduate program by teaching at Northview High School! I am looking forward to growing as an educator and to further your student's educational journey.

During my four years as a Centralis Scholar in the Honors program at CMU, I was able to learn and grow in various environments. I had amazing opportunities to study abroad in South Korea, Australia, Ireland, and Italy - all of these countries provided me with unique experiences that have inspired and shaped me into who I am today and who I want to be as a future educator. More specifically, my field experience at the Youthreach Center in Mayo, Ireland prepared me to work with students with little mathematical skills and low learning interest. I challenged students to help them see and learn mathematics through a positive perspective - a good attitude can change many outcomes.

I believe that good leadership truly encourages personal growth and have always been passionate in everything I do. From high school senior class President to President of the Honors Math Club at CMU, I have refined my organization and communication skills. I was also the Vice President of the Ski and Snowboard Club at CMU so I am excited to get involved with various clubs and groups at Northview High School, I want to help your student become their own confident leader in the community.

I will be in the classroom full-time from the first day of the school year to the middle of December, teaching lessons, conducting small group activities, co-teaching, and learning as much as I can from Mrs. Ely. I am looking forward to working with your student - thank you for the opportunity!

Sincerely,

Yejean Han
